Examiner's Statement of Reasons for Allowance

1. Claims 23-28 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed

invention. Specifically, the prior art fails to teach, in combination with the remaining

elements as recited in claims 23, 27, and 28.

The present invention is directed to a method for beam forming a radio frequency

signal radiated from an antenna using a frequency selective surface and maintaining a

constant impedance over a wide frequency range in a phased array antenna having a

frequency selective surface.

Regarding to claim 23, Prior Arts fail to teach that dynamically changing the

composition of a fluidic dielectric within the frequency selective surface to vary at least

one among a permittivity and a permeability in order to vary a propagation delay of said

radio frequency signal through the frequency selective surface.

Regard to claims 27, and 28, Prior Art fails to teach that that dynamically

changing the composition of a fluidic dielectric within the phased array antenna to vary

at least one among array parameters selected from the group comprising coupling

among elements of the frequency selective surface, resonances of said elements.

Claims 24-26 are allowed for depending on claim 23.

Art Unit: 2821

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Reineix et al. (US 6456254 B1) teach a reflector forming a parabolic antenna, the reflector being characterized by the fact that is is made up of n layers of dielectric materials.

Inquires

Page 4

Any inquiry concerning this communication or earlier communications from the 4.

examiner should be directed to Huedung Cao whose telephone number is (571) 272-

1939.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Don Wong, can be reached on (571) 272-1834. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

5. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
